## WORK EXPERIENCE

---

**Web Developer**  
Ocean View Estates | Victoria, BC

Sep 2020 – Oct 2023

- Assumed the role of project owner, leading design reviews, gathering client requirements, and spearheading the development of the company's website using HTML5, CSS, JavaScript, MySQL, and MongoDB.
- Designed and implemented an efficient dashboard allowing clients to purchase online tickets, leading to a 40% reduction in manual work.
- Managed website maintenance, including upgrade analysis and planning, security administration, troubleshooting, and performance tuning.
- Automated server data backup processes, resulting in a 30% increase in efficiency.
- Regularly delivered comprehensive reports to clients on a weekly basis.

**Web Developer**  
The Barn School | Victoria, BC

August 2018 – April 2019

- Conceptualized and constructed a purpose-driven website tailored for non-verbal and autistic children. Implemented a secure login system for both students and teachers, allowing teachers to effortlessly post course material and students to conveniently pay for their courses.
- Collaborated as a proactive team member, contributing to the full software development lifecycle: from design and coding to testing, reporting, and debugging operations.

- Demonstrated adept problem-solving skills by swiftly identifying, diagnosing, and resolving website issues, including addressing broken links and formatting discrepancies.
- Played a key role in achieving a harmonized visual identity for the website, ensuring a consistent look and feel by promoting uniform fonts, images, and layout.
- Provided invaluable training sessions to non-technical teachers, equipping them with the knowledge to navigate the website and troubleshoot computers on board.

## PROJECTS

---

### Weather Application

[View in Github](#)

- SheCodes Plus Weather App Final Project
- Interactive weather application built using **HTML**, **CSS** and **JavaScript**.
- Includes search engine, Weather **API integration**. Users can search for any city in the world and receive accurate weather and forecasts.

### To-Do Application

[View in Github](#)

- Developed a dynamic and user-friendly to-do list application using **HTML**, **CSS**, and **JavaScript**.
- Integrated functionality to allow users to add tasks to the list, providing a seamless task creation process.
- Incorporated a delete button feature, enabling users to remove tasks from the list, enhancing flexibility and customization.
- Utilized local browser storage to persistently save and retrieve the task list, ensuring that users' data is preserved even after closing the browser.

### Portfolio

[View in Github](#)

- Developed a personalized and professional portfolio website using **HTML**, **CSS**, and **JavaScript** to showcase a comprehensive overview of my skills, experiences, and projects.
- Implemented a contact form for seamless communication with visitors.
- Showcased proficiency in **front-end development** by incorporating smooth transitions, animations, and a visually cohesive layout, enhancing the overall user experience.
